

Renjith Madhavan

C: (312)-479-7165

Email: renjithmadhavan@gmail.com

Over 7+ years of experience in IT with strong analytical & technical skills. Experience in complex data warehouse projects combined with excellent communication & interpersonal skills. I will be completing my Graduate Degree in Data Science in May 2017 and have done several hands-on projects in Data Science using R and Python. I have strong fundamentals in Statistics and Math and know how to apply the concepts in a practical setting.

Education

- | | | |
|--|----------------------|-----------|
| • Masters in Data Science | Elmhurst College, IL | 2015-2017 |
| • Bachelors – Computer Science And Engineering | CUSAT, India | 2001-2005 |

Key Skills

- | | |
|------------------------------------|---|
| • Statistical Analysis | • Python |
| • R + key data mining packages | • Microsoft Azure |
| • Tableau | • ggplot2 |
| • matplotlib | • Sql over large data sets |
| • Data Validation | • Automation/scripting |
| • Dataware House /ETL skills | • Reporting skills |
| • Big Data / Hadoop Experience | • Critical Thinking |
| • Netezza/Oracle/sql server/mysql | • Apache Spark |
| • AWS/Google Cloud/Microsoft Azure | • Machine Learning (classification, regression and clustering techniques) |

Certifications

- | | |
|--|---|
| ○ Time Series Analysis | Data Camp |
| ○ Deep Learning Course | University of San Francisco (Jeremy Howard) (Training/no-certificate) |
| ○ Tackling the Challenges of Big Data | MIT-CSAIL |
| ○ Intermediate Python For Data Science | Data Camp |
| ○ Intermediate R | Data Camp |
| ○ Oracle Certified Professional | Oracle |
| ○ IBM Pure Data System for Analytics | IBM |

Professional Experience Summary

<u>Company Name</u>	<u>Clients</u>	<u>Domain</u>	<u>Role</u>	<u>Year</u>
▪ Epsilon	Bank Of America	Banking	Senior DBA	2014/Dec - present
▪ Accenture	Astellas	Pharma	Senior DBA	2014/Jan – 2014/Dec
▪ Accenture	BestBuy	Retail	DBA	2011/Jul – 2014/Jan

Data Science Projects

Elmhurst College, Graduate Student in Data Science

Project: Credit Risk Modeling - Loan Data

Team Size: Individual

Programming: R

Details: Analyzed and studied loan dataset for an end to end Data Science project to do Credit Risk Modeling and completed model scoring using 2 different models, compared the results and produced detailed reports.

- Followed CRISP-DM for end to end project flow.
- Qualitative Analysis
- Identified Outliers
- Built models using logistic regression and decision trees.
- ROC curves and Confusion Matrix

Elmhurst College, Graduate Student in Data Science

Project: Data Science Bowl - 2017

Team Size: 2

Programming: Python

Details: Analyzed and studied high-resolution lung scans to detect cancerous nodules.

- Used pre-trained neural networks
- Experimented with convolutional neural networks using Theano and Tensorflow
- Experimented with Microsoft CNTK
- Currently in Kaggle top 20%

Project: Quora Question Pairs

Team Size: Individual

Programming: Python

Details: Use NLP techniques to identify whether question pairs are identical or not thus making it easier to find high quality answers to questions resulting in improved experience for Quora writers, seekers and readers.

- Used Python for the experiment
- Used Python Natural Language Tool Kit (NLTK 3.0)
- Created models using XGBoost
- Experimented with stop words, unigrams and bigrams

Professional Experience

Database Administrator	2014 – Present	Epsilon, Irving, TX
-------------------------------	-----------------------	----------------------------

Client: Bank of America

Role: Senior Database Administrator

Team Size: 6

Details: Responsible for managing IBM pure data systems for analytics appliances which process massive amount of big data. Help data scientists and data analysts in running their models by tuning and optimizing database systems for efficiency. Maximize pure data systems for data analytic usage.

Innovation: Designed and implemented in house Disaster Recovery solution using shell script.

Senior Software Engineer	Jul 2011 – Dec 2014	Accenture, Chicago, IL
---------------------------------	----------------------------	-------------------------------

Client: Astellas Pharmaceuticals, Northbrook, IL
Role: Data Architect
Team Size: 15

Details: Responsible for performing technical data lineage, documenting detailed data flows, calculations, manual touch points, control point areas, and feeds used to source the data. Liaison between Development team members and Business stakeholders. Capture and understand the requirements from users and translate the users' requirements into functional specifications in a Data Warehouse/BI application environment. Design a solution that adheres to the business intelligence architecture principles, standards and guidelines. Unit, System and UAT tested expected results in all phases.

Innovation: Designed and implemented process to mask sensitive PII data.

Client: BestBuy, Minneapolis
Role: Senior Database Administrator
Team Size: 25

Details: Responsible for handling business critical transactional databases of large volume. Senior database administrator for more than 1000 databases on UNIX platform which were distributed geographically. Responsible for tuning SQL queries and provide better alternatives. Migrate and upgrade legacy servers, storage and databases without interruption to normal business operations.
